### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

#### Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description:

- 364 Figure 3 (para 0029 line 2)
- 480 Figure 4 (para 0030 line 2)
- 1070 Figure 10 (para 0036 line 4)

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description:

- 231, 233 Figure 2
- 300, 362 Figure 3
- 440 Figure 4
- 564 Figure 5
- 620 Figure 6
- 720 Figure 7
- 870 Figure 8
- 1000 Figure 10

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "1030" and "1040" have both been used to designate rotational support structure (para 0036 line 7 and figure 10). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid

Art Unit: 3653

abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The drawings are objected to because 1030 Figure 10 should indicate the handle as set forth in the specification (para 0036 line 7) rather than the current part indicated. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 3653

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. In addition to Replacement Sheets containing the corrected drawing figure(s), applicant is required to submit a marked-up copy of each Replacement Sheet including annotations indicating the changes made to the previous version. The marked-up copy must be clearly labeled as "Annotated Sheets" and must be presented in the amendment or remarks section that explains the change(s) to the drawings. See 37 CFR 1.121(d)(1). Failure to timely submit the proposed drawing and marked-up copy will result in the abandonment of the application.

#### Specification

7. The disclosure is objected to because of the following informalities:

- Para 0009 line 5 "at" should read a
- Para 0027 line 2 "Or" should or
- Para 0036 lines 6-7 "Handle 1030 is attached to one of end caps 1030", one of the 1030 references should be a different applicable reference character

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

8. Claims 1-25 are allowed.
9. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
10. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1 and 13 the claims recite,  
a jam clearance element, wherein said jam clearance element comprises:  
at least two guide elements having facing surfaces, wherein said  
facing surfaces define guide surfaces for at least one media path, said guide  
elements further having external surfaces capable of supporting said flexible  
media as it is wrapped around said external surfaces;  
  
pivotal support means including a rotatable element for rotational  
movement of said jam clearance element within the substantially rigid supporting  
structure.

As prior art was not found disclosing such structure, claims 1 and 13 are hereby allowable. Furthermore claims 2-12 and 14-24 are allowable as they are dependant upon an allowable independent claim.

Regarding claim 25 the claim recites,

Art Unit: 3653

driving at least one unit of flexible media through at least one media path located within the media path jam clearance element, wherein said media path is defined by at least two guide elements having facing surfaces defining said media path and external surfaces capable of supporting said flexible media as it is wrapped around said external surfaces;

retracting the guide baffles to a position sufficient to prevent interference of the guide baffles with rotational movement of the jam clearance element within the substantially rigid supporting structure;

causing rotational movement of the jam clearance element about pivotal support means within the substantially rigid supporting structure when said flexible media has become jammed in said media path, such that said captured unit of flexible media is wrapped around said external surfaces.

As prior art was not found disclosing such steps of the method presented claim 25 is hereby allowable.

### ***Conclusion***
